Respiratory Fit Test Acknowledgment

Name: 

Company: 

Respirator Manufacturer:

- MSA
- 3M
- Willson
- North
- Scott
- Moldex
- AOSafety
- Pro-Tech
- Survivair
- Other:  

Model/Series #: 

Size: Small  Medium  Large

Your qualitative or quantitative fit test has been completed for the type of respirator(s) used during the test procedure. Fit testing does not assure or guarantee that contaminants will not leak into the facepiece. (This is particularly true of disposable filtering facepieces.) The fit test serves to identify a particular face mask that minimizes this leakage. The following factors may affect the face-to-facepiece seal:

- weight change of 20# or more
- significant facial scarring or dental changes

If any of the above occur, or if nose/throat irritation occurs or if the odor of contaminants is noticed while wearing the respirator, fit testing should be repeated. Facial hair growth (even one day's stubble) will interfere with the face-to-facepiece seal and must be kept to a minimum.

I acknowledge that I have been informed of and understand the above restrictions:
